Hi Carl, Monica,

Here's a draft agenda for today's briefing, attached.

Thanks,

Jody

Jody.

I sent a copy of the strategy to the Park Service.

Also, for our meeting with OPRA next week can you work on an agenda?

I'm thinking of the WEA letter and next steps, update on the EI work and the draft letter, prep for RA's meeting with the Tribe and messages for that meeting.

Thanks

Carl Daly, Director

Air Program

Hi Carl,

Here is the version of the UB strategy that we shared with Utah and the Ute tribe. This is still a good summary to share with the national park service, tho it hasn't been updated in a year.

Thanks,

Jody

Subject: Uinta Basin Strategy

Hi Colleen and Minnie,

As you know, EPA has several active air-specific efforts going on in the Uinta Basin. Utah and the Ute Tribe are both participating in EPA's voluntary Ozone Advance program, and I am here to provide technical support and guidance as you continue development of your path forward strategies. Recently, our management team met to discuss a coordinated approach to our work and identified six air work areas as summarized below:

- Community outreach (Regional Commitment item)

- General Permit/Federal Implementation Plan for oil and gas
- Monitoring
- Deseret permit action
- Ozone advance
- Winter air quality studies/modeling

In order to accomplish this work, we have a team with expertise in each of the areas listed above. I was selected to serve as the central

project coordinator to lead this effort. My responsibilities include providing regular status updates to EPA management, serving as a central point of contact for the Uinta Basin air work for both internal and external stakeholders, and keeping the effort moving forward.

To that end, I would like to ask if you would be interested in setting up regular conference calls to discuss progress in these areas, and ways that we can work together. I have attached a Uinta Basin strategy document, which provides more information on our current efforts.

Please note, for the monitoring section I will have to follow up with the maps/table at a later date because our monitoring expert is out until mid-May. Thanks, I look forward to hearing from you!

Jody
